The Pusiga District was carved out from Bawku Municipality and established by L. I 2145 on  $28^{th}$  June, 2012.

The District is located approximately between latitude 110 111 and 100 401 north and longitude 00 18 1 W and 00 61 E in the north-eastern corner of the Region. The District shares boundaries with Burkina-Faso to the north, Republic of Togo to the east, Bawku Municipality to the west and Garu and Tempane District to the south. The total land size of the district is 256 sq km.

It is characterized by small-scale food processing, craft and manufacturing. The industry is dominated by smock weaving, pottery, blacksmithing, pito brewing and food processing. Due to its strategic location and proximity to eastern Burkina Faso and Northern Togo as well as easy access to Mali and Niger, there is potential for international trade.

## a. AGRICULTURE

The District Department of Agriculture coordinates monitors and evaluates all agricultural related activities and programmes towards the development of agriculture and maximizing productivity for sustainable food security, while maintaining climate change resilience in the District.

Major crops cultivated are millet, sorghum, maize, rice, groundnuts, leafy vegetables, pepper, water melon, onion and livestock such as cattle, sheep, goats, and donkeys. Food stuff such as sweet potatoes and water melon are loaded on donkey carts to Bitou in Burkina Faso and Cinkansse in Togo in commercial quantities.

Out of the total land areas of 50,505 sq. Km, the cultivable area is 20,767.9 HA.

From table 1, one would have realized that most dams in the district have existed over half a century. Consequently, these dams have developed several faults including broken canals, value leakages, broken walls, damaged spillways etc. almost all the dams have also sited up and needed desilting. In fact the existing dams are not meeting user needs due to the situation that has just been described. It is therefore necessary for the dams to be maintained in order to properly serve the purposes for which there were constructed. The existing dams have a combined irrigable area of 492 HA.

Feasibility studies of the district revealed that additional 10 dams could be constructed to support the existing ones which would further increase agricultural production especially dry season farming. It is therefore hoped that the government flagship programme, One-Village-One-Dam (1V1D) would consider this potential of the district and construct dams at the identified communities within the medium-term. Table 2 shows the location of potential dams within the district.

## b. MARKET CENTER

The Pusiga District has Six Markets located at Pusiga, Kulungungu, Widana, Zong-Natinga, Nakom and Nware. Although some of the markets are well patronized, none of them is developed in terms of infrastructure.

#### c. ROAD NETWORK

The pusiga district is poorly linked in terms of road network. Out of about a total road length of 320 km, only 6km representing 5% is developed.

The situation has a debilitating effect on every facet of the district's development more especially on farmers.

## d. Education

The District has forty-six (46) Public Pre-Schools (KG), forty-six (46) Public Primary Schools, thirty-four (34) Public Junior High School (JHS) and one (1) Tertiary institution. There are also fifteen (15) Pre-schools (KG), Fifteen (15) Primary Schools, Nine (9) JHS. The District has One Hundred and Sixty-six (166) schools both private and public.

## e. HEALTH

Health is of paramount importance to every individual as far as livelihood in general is concerned. Mindful of this, the Pusiga District Assembly has taking it as a priority to ensure that the necessary infrastructure are provided to facilitate health care delivery even though this is not without challenges. The District Assembly in collaboration with the District Health Directorate has constructed some CHPS compounds to augment health services delivery in the District. The District Health Directorate has divided the District into five (5) sub-districts namely Widana, Pusiga Central, Nakom/Zuabulga, Kulungungu/Kultamsi and Sarabogo sub-districts. Each of these sub-districts has at least one (1) health facility to provide the minimum package of basic health services to the catchment population. Below are the distribution of facilities by sub-district and the range of services they provide.

It would be realized from Table 10 that most of the health centres lack the necessary facilities that are needed for maximum service delivery. Eight out of the 16 facilities are not connected to the national grid. In most cases there are no any sources of energy. Some facilities have no delivery rooms, a situation that is worrying. The District Health Directorate is calling on the District Assembly and other Development Partners (DPs) to intervene to solve some of the critical needs at the facilities.

Table 11 shows that the district has twenty (20) demarcated Community-based Health Planning and Services (CHPS) zones out which fifteen (15) are fully functional. A total of eight (8) have compounds. Out of the 15 only 7 are currently reporting on dhims2 with the remaining 8

reporting through their mother facilities. These facilities serve 67.8% of the total district's population and 69.7% (53) of the total number of communities in the district.

Staffing levels for CHPS is not optimum and the state of some CHPS compounds are dilapidated especially Kultamsi, Zuabulga and Sarabogo CHPS. They need serious and urgent renovation. Because of the outreach services, basic equipment for service delivery like weighing scales, thermometers, stethoscope are inadequate as most CHPS zones had no basic equipment's at all.

#### f. WATER AND SANITATION

About 36% of the District population lacks potable water. There are two (2) small town water systems in the District, located at Pusiga and Widana. Three hundred and fifty three (353) point sources, eighteen (18) hand-dug wells and four (4) fitted with pumps throughout the District.

Statistically 63.1% of the populations have access to potable water, whilst the 36.9% depends on unsafe sources of water.

Some of the factors that militate against the potable water supply include ineffective WSMT-STs/SCs, long distance covered by some people in the rural areas to have access to boreholes as a result of the dispersed pattern of settlements, inadequate logistics for monitoring among others.

Generally, the sanitation situation of Pusiga District is bad. The district is lacking critical sanitation facilities that are necessary for improved sanitation.

Most households lack improved toilet facilities leading to high levels of open defecation.

Details of the sanitation situation in the district are reported in the tables below.

In Table 4, the district required a skip loader, a tractor and 7 communal refuse containers in order to tackle its solid waste challenges. The absence of the above facilities is affecting solid waste disposal in the Municipality.

## g. ENERGY

The energy coverage of the Pusiga district stands at 86%. Out of 127 communities, 110 of them have been connected to the national grid.

There are 38 petrol and diesel stations in the district. The district is however, lacking a gas filling station.

Investing in a gas filling station in the district will be a viable business opportunity.

## PROGRAMME1: Management and Administration

## SUB-PROGRAMME 1.3 Legislative Oversights

## 1. Budget Sub-Programme Objective

To ensure full implementation of the political, administrative and fiscal decentralization reforms.

## 2. Budget Sub-Programme Description

This sub-programme formulates appropriate specific district policies and implement them in the context of national policies. These policies are deliberated upon by its Zonal/Town/Area Councils, Sub-Committees and the Executive Committee. The report of the Executive Committee is eventually considered, approved and passed by the General Assembly into lawful district policies and objectives for the growth and development of the district.

The office of the Honourable Presiding Member spearheads the work of the Legislative Oversight role and ably assisted by the Office of the District Coordinating Director. The main unit of this sub-programme is the Zonal/Area Councils, Office of the Presiding Member and the Office of the District Coordinating Director.

The activities of this sub-programme are financed through the IGF, and DACF funding sources available to the Assembly. The beneficiaries of this sub-programme are the Zonal/Town/Area Councils, local communities and the general public.

Efforts of this sub-programme are however constrained and challenged by the inadequate logistics to the Zonal/Town/Area Councils of the Assembly.
